

Board & Batten

Hidden Fastener Steel Cladding Panel

Get a longer lifespan and more design possibilities with our steel upgrade on the popular Board & Batten cladding panel. The batten extrusions provide long clean lines and the shadows they create add dimension and interest to any building design, especially when paired with our Textured Colour Series. The panel system provides a 9.75" coverage, with a 2.25" long batten extruded at just under 0.5" - keeping it flush with other popular cladding profiles. Easy installation with a clip system, and no exposed fasteners makes this a simple yet stylish cladding option for residential and commercial applications.

Board & Batten

Specifications

Wall Coverage: 9.75"
